

Ben,

Our firm is grateful for this effort. We are glad to share with your audience that this effort benefited one of our best customers and ultimately our firm. From a risk mitigation perspective, we had a giant hill to climb but with your help and the cooperation of several key partners we were able to turn a struggling company into a successful venture which is now well on its way to yielding a strong balance sheet and a consistent profit.

The two back-to-back 13-week cash flow plans generated gave Provident clear insight into the company's critical expenses and helped us firm-up a cash flow assistance program using Invoice Factoring. We've been able to focus their team on new business development while our team monitors and assists the management with critical expenses and debt service.

Since you've departed the scene, the company's revenue has grown an additional 25%, several equipment creditors are paid off and additional trucks/routes have been added.

Provident Commercial Finance is proud to call Fortis Business Advisors a preferred partner!
